PROLOGUE - PATHWAYS

Father Randolph Holton was dead. Not literally, of course. But in his heart, he knew he could not live on...not after everything he had learned. Sitting at his dark oak desk in the corner of the dimly lit, cozy study, the white-haired, frail Catholic priest—even frailer of late--dipped an old quill in a container of jet-black ink and began to write...

If you enjoy the early 2D Duke's/Commander Keen platformers you will also enjoy this one, nothing special, solid DOS nostalgia. Overall a good quiz game. Combines gambling and knowing stuff in a nice way. Even though the target audience is probably adults my son started crying like a Fiat 500 b*tch when i told him to go to bed after playing it with us. Already felt my IQ increase a little after playing it for an hour even though it's quite high already (the IQ). Oh and you'll need your phone to play it.. It's interesting. Even though Sonic was just as popular in the early 90's as Mario, Mega Man, Castlevania, Metroid, Contra, Final Fantasy and Street Fighter 2, there are very few indie developers that have tried to update the Sonic formula. While there have been countless attempts at the listed contemporaries.

Even Sega themselves don't seem to be able to update the franchise effectively, seeing as their only Sonic game to be widely considered good in the last 20+ years is by a fan they hired to make a game.

Spark takes a whack at it and I think they did a very fine job. Though it twists the Sonic formula liberally (there is some Mega Man X and DMC concepts mixed in) the game has a very similar feel to Sonic. It's got the speedy play, loop de loops, springs, pinball bumpers, etc. These all work well without the cheap surprises some of the Sonic games are know for.

The main game has a character who can hold 2 of a large pool of weapons that all attack differently. There is also a lot of wall jumping and air dashing, this is where I see the similarities to Mega Man X. It also has a larger focus on boss fights than Sonic generally did and pretty well all the boss fights are a lot of fun

As far as level design, there are a few that are not as interesting but there are some very good levels as well. They all tend to follow the Sonic level design philosophy with the huge levels with multiple paths and they have quite a bit of verticality.

It also has a pretty great sound track that does sound like Sonic. Visually, it looks like a Genesis game and it looks good... except the cutscenes, which look like they were drawn by a middle school kid who was told to draw something like Sonic but not Sonic. It's weird to see the in game graphics look so competent and then see the poor art pop in when it tells the story. Speaking of the story, it's about as relevant to the experience as you'd expect for a game like Sonic, that is to say, it's nonsense.

Another thing that is very impressive is that once you finish the game, you are given the option to play again as a different character. This character plays very differently, so differently that the levels are all redesigned in order to work with this character. I personally found the second character to be even more enjoyable than the first.

If you like 2D platformers and action games, I would recommend this, even if you are not so hot on Sonic.. A Very Nice Rhythm game UwU. Very cute and colorful, It will make you unbelievably hungry. The art is beautiful and the soundtrack is premo. I found this through "The sad story of Emmeline burns" Ebi-Hime is now one of my favorites, Need to purchase the rest. 10/10

Fell Through the floor a few times while in the courtyard, so a patch is needed but game is interesting. Plus, The player is completely naked.....5 stars. Given how old it is this is a fun little nugget in the vein of old school XCOM, easily worth \$5. It's a really **special** collection of mini games, it's cheap and not bad.. I'm obviously missing something about this game given all the great reviews - it just doesn't do it for me.

There's a lot to love about it. It's quirky, and as everyone notes, a quick play to fill some time.

That said - after a handful of play throughs, there just isn't any meat here to chew on. I tried a couple short games to get the hang of it, but you can't built your ship up enough to withstand any battles, and the game is over so quickly, you better not stray too far or you'll never make it back to base in time.

Playing longer games was a more enjoyable experience. Here too though, I found it very hard to survive virtually any combat encounter.

Other than combat, all there really is, is going to each planet and putting whatever "thing" you find there in cargo, every once in a while trading with a wandering store - presumable trading up for more points at end game. Then even at end game, there's no winning in the classic sense, just a final tally of your credits based on what you found minus what you owe.

That's pretty much it unless I'm missing something. I generally like quick time fillers, and I love quirky games, but I just can't find a way to like this one. I don't regret the couple bucks to play it a while, but I doubt it will get much replay from me.. Brilliant due to it's simplicity. Go get it! It's a must have for all old school lovers (like me).. This Game is Crap. Very good RPG. You're a guy with Albino Hunter "title" and after a night of drinking you wake up to find that you're broke and not level 42 any more, but level 1. So you do jobs to level up and get gold to get better equipment and so on. The people you meet are interesting, they often come with humour-in-dialogues DLC which is neat. The combat system is good, you'll level up at a decent pace. All in all a good RPG.

Lil' Sucky Gameplay to go with the review.
